

Dementia-inclusive Streets and Community Access, Participation, and Engagement

What is this study about?

- Understanding how people living with mild to moderate dementia use their streets
- Exploring how streets and outdoor spaces can be made more accessible and dementia-friendly

Scheduling will be at your convenience, based on your availability.

Lead Researcher

Dr. Habib Chaudhury (SFU)

Co-Researchers

Dr. Lillian Hung (UBC)

Dr. Alison Phinney (UBC)

Dr. Shannon Freeman (UNBC)

Dr. Mark Groulx (UNBC)

Prof. Dawn Hemingway (UNBC)

We want to hear your thoughts!

Do you find it easy to make your way around your neighbourhood?

What do you like/dislike about your streets?

What could be done to make your streets better for walking and finding different places?

What would participants be asked to do?

A member of our team will schedule with you (and your care partner/family member if needed):

- Conversations on three separate days at your home or preferred place about experiences of walking in the neighbourhood
- One outdoor walk with the researcher in the participant's neighbourhood on a route of their choice
- All activities will follow latest COVID-19 guidelines

Scheduling will be at your convenience, based on your availability.

Who can participate?

We are looking for **persons living with mild to moderate dementia** in the community who can walk independently and communicate comfortably in English.

Participants will receive a **\$200 honourarium** for taking part in the study.
